

POLSKIE RATOWNICTWO OKRĘTOWE sp. z o.o.

ul. Miodowa 26, 81-558 Gdynia

AHTS ONYX DP 2 has just finished Time Charter.

The newest vessel in our fleet AHTS ONYX has just finished Time Charter at Malta offshore for transports of sensitive equipment and personnel to and from advanced drilling vessel located on Malta offshore. Transports were performed between the vessel and Valletta port base. Multiple STS (ship to ship) operations at Malta offshore were performed with modern Kongsberg K-POS DP2 system. DP2 was used at 500m zone, at approaching to drill ship loading, operation of loading of 15 raisers (special pipes for oil products transfer) and containers from drill ship to our deck, as well as at personnel transfer. Loading of cargo to ONYX's deck was done by drill ship crane at open sea what as usually required perfect, faultless cooperation between the vessels.

The AHTS ONYX meets the highest standards of the offshore industry, in respect of technical aspects as well as personnel selection and our ISO 9001:2015 Quality System and Safety Management System. Full safety, no incidents, neither no near miss situations were noticed during the whole Charter, what is the standard in our fleet operations. The transports were done with respect to energy efficiency policy. The whole scope of work was performed within assumed time, taking into account the Charterers requirements and expectations. The Charter has been completed with full satisfaction of the Charterers, our good vessel AHTS Onyx and the Company.
